

# leva s

reimagining what a lever-actuated espresso machine can be.

## Available Configurations: LEVA

## Available Number of Groups: 2 | 3

Leva rethinks the form of a lever espresso machine. No longer must safety be compromised in order for a café to use lever technology. The lever group gives line of sight to the captivating breakthrough mechanics. Leva features groundbreaking design, and technology in a

mechanical, reliable, and user friendly machine. The innovative design reduces the force required to operate the machine by almost 50% compared to a traditional lever machine, while also introducing a safety clutch system. Leva machine makes it possible to adjust both

the pre-infusion pressure and the maximum extraction pressure delivered by the lever piston, allowing to personalise coffee brewing and attain consistent shots. With over 2500 hours of testing, Leva sets a new standard for the reliability of a mechanical system.

### Dual Boilers

Separate boilers optimise espresso brewing and steam production.

### Insulated Boilers

Reduce energy consumption while contributing to temperature stability.

### Adjustable Drip Tray

Allows you to use the machine with tall, to-go cups.

### Dedicated Pressure Gauges

Monitor real-time pressure applied by the lever system on the coffee puck.

### Eco Mode

Can be programmed to enter stand-by mode, improving energy efficiency.

### Cup Warmer - option

Maintain espresso and cappuccino cups evenly heated at a proper temperature.

### Saturated Groups

Ensure unsurpassed thermal stability, shot after shot.

### Graphic Display

Intuitive programming makes it easy to adjust machine parameters.

### Hot Water Economiser

Enables you to fine-tune the tap water temperature for tea.

### Dual PID (coffee and steam)

Allows you to electronically control coffee and steam boiler temperature.

### Pro Touch Steam Wands

High performing steam wands that are cool to the touch.

### USB

Making it possible to update the firmware.
